ORGANIZATION OVERVIEW

featuring **JAMAICA**

Ecology Agriculture Trade (E.A.T.) Indigenous Jamaica is a grassroots community organization dedicated to ecological sustainability, indigenous cultural preservation, environmental stewardship, youth empowerment, wellness education, and regenerative economic development throughout Jamaica and diaspora communities.

E.A.T. develops community-based solutions through ecological agriculture, environmental clean-ups, multimedia education, cultural programming, youth workshops, community gardens, and sustainable technology initiatives.

The organization is currently completing **development of the E.A.T. mobile application**, now in beta testing, which will connect communities to educational resources, local farmers, artisans, eco-friendly commerce, sustainability tools, wellness initiatives, and community networking opportunities through Google Play and Apple iOS platforms.

Major initiatives include:

- Eco Hive sustainability projects
- Good Neighbors Garden Club
- Rastafari Renaissance Fridays
- Community clean-up campaigns
- Youth environmental and multimedia workshops
- Cultural preservation initiatives
- Local farmer and vendor support programs
- Environmental awareness and regenerative living education

Proposed Project

E.A.T. My Eco Hive Indigenous Sustainability & Community Empowerment Initiative

The proposed project seeks to expand ecological education, sustainable agriculture, youth training, indigenous cultural preservation, food security, and grassroots economic empowerment initiatives throughout Jamaica.

The project combines community engagement, environmental stewardship, multimedia education, regenerative living practices, and digital technology to strengthen underserved communities while promoting long-term sustainability and resilience.

Funding will support:

- Eco Hive community sustainability spaces, community gardens and food security programs
- Youth environmental and multimedia education
- Local farmer and artisan support initiatives
- Cultural and wellness programming
- Environmental clean-up campaigns
- Multimedia outreach and educational content
- Completion and public launch of the **E.A.T. App**
- Expansion of **MyEcoHive.com** international marketplace and e-commerce platform for eco-friendly products, indigenous goods, wellness services, sustainable tourism, and community-based trade opportunities

Project Goals & Outcomes

The project aims to:

- Launch the **E.A.T. mobile app** on Google Play and Apple iOS
- Expand the **[MyEcoHive.com](https://www.MyEcoHive.com)** international marketplace platform
- Support local farmers, artisans, and small vendors
- Increase environmental awareness and sustainable living practices
- Expand youth education and creative training programs
- Strengthen indigenous cultural preservation initiatives
- Develop Eco Hive community sustainability hubs
- Produce educational multimedia content for public outreach
- Create scalable community-driven sustainability and fair-trade models throughout Jamaica

Community Impact

E.A.T. Indigenous Jamaica has organized and supported:

- Community beach clean-up campaigns since 2014
- Youth environmental education initiatives
- Community gardens and urban agriculture projects
- Free health fairs with the **[JAHJAH Foundation](#)**
- Rastafari Renaissance Fridays farmers & vendors markets and cultural programs
- Local farmer and vendor empowerment initiatives
- Multimedia outreach promoting sustainability and cultural preservation

The organization has also received community recognition, including a Mayor's Award from the City of East Orange for environmental and youth-focused initiatives.
